

**An information guide for patients
aged 16 years and over and their
families to help understand online
proxy access at Deddington Health
Centre**

Online proxy access is when someone else has permission to access another person's medical record online. This helps them look after the patient and allows them to see their allergies and/or immunisations, to order repeat prescriptions and to see any appointments already booked.

Online proxy access is most beneficial to patients who need to order repeat medication for the person they are caring for.

Any patient aged 16 or over may wish to have an online proxy to help them manage their online medical record.

You will be required to provide ID for all parties involved and the Practice will also require verbal consent from the patient to ensure they are happy for any online proxy arrangements to be put in place. If you wish to apply for an online proxy arrangement then please do so by clicking the link below to take you to the application form.

[Deddington Health Centre - Proxy Access for 16+ years – Fill in form](#)

Paper copies of all information and application forms are available by contacting the Practice.

Online proxy arrangements can be removed at any time by contacting the Practice.
